FORCE

FORCE

The most important element of Force is a demanded product, which each participant acquires by activating the slot level.

AT THE SAME TIME, WE RETAIN OUR FAMOUS ADVANTAGE:

100% goes to the affiliate network, that's — your and your partners income.

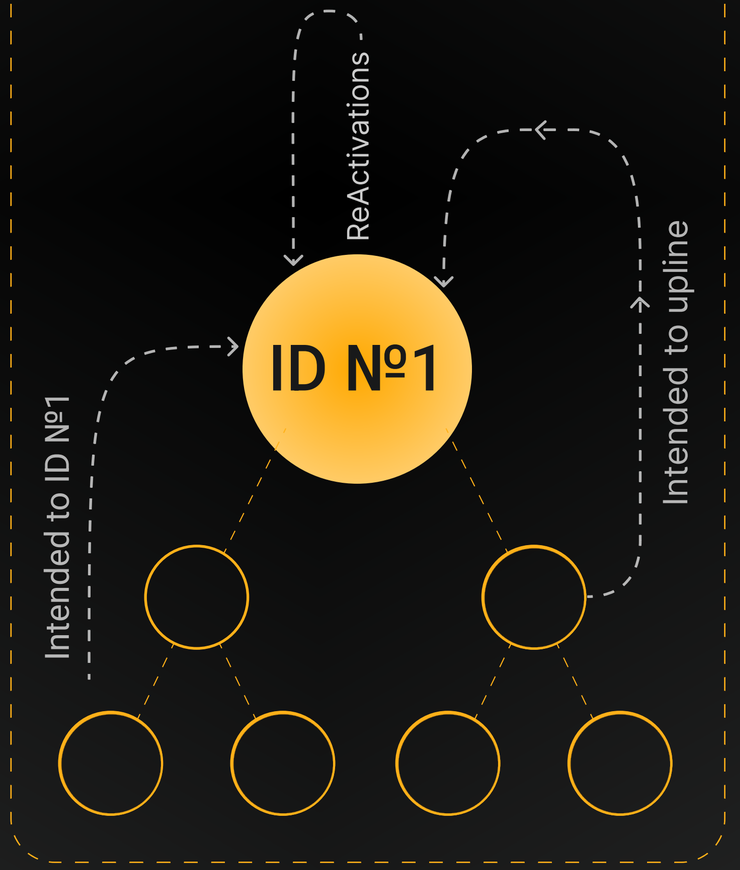
HOW DID WE DO IT?

We'll reveal the secret to you soon...

ID №1 - YOUR EQUAL PARTNER
ID №1 ONLY RECEIVES MARKETING REVENUE

OLD SCHEME

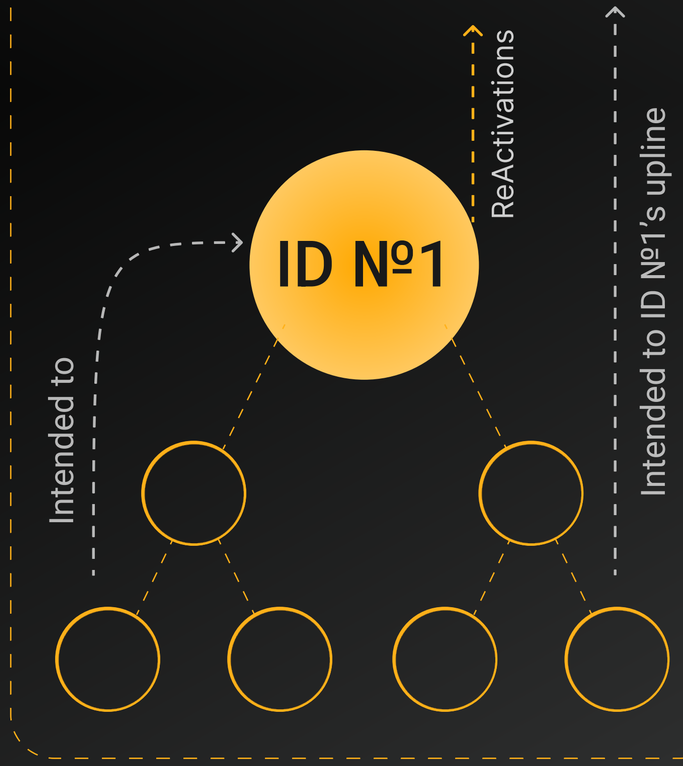
the creators took surplus income for themselves



FORCE SCHEME

Surplus incomeare directed to the Product Fund, to a separate smart contract

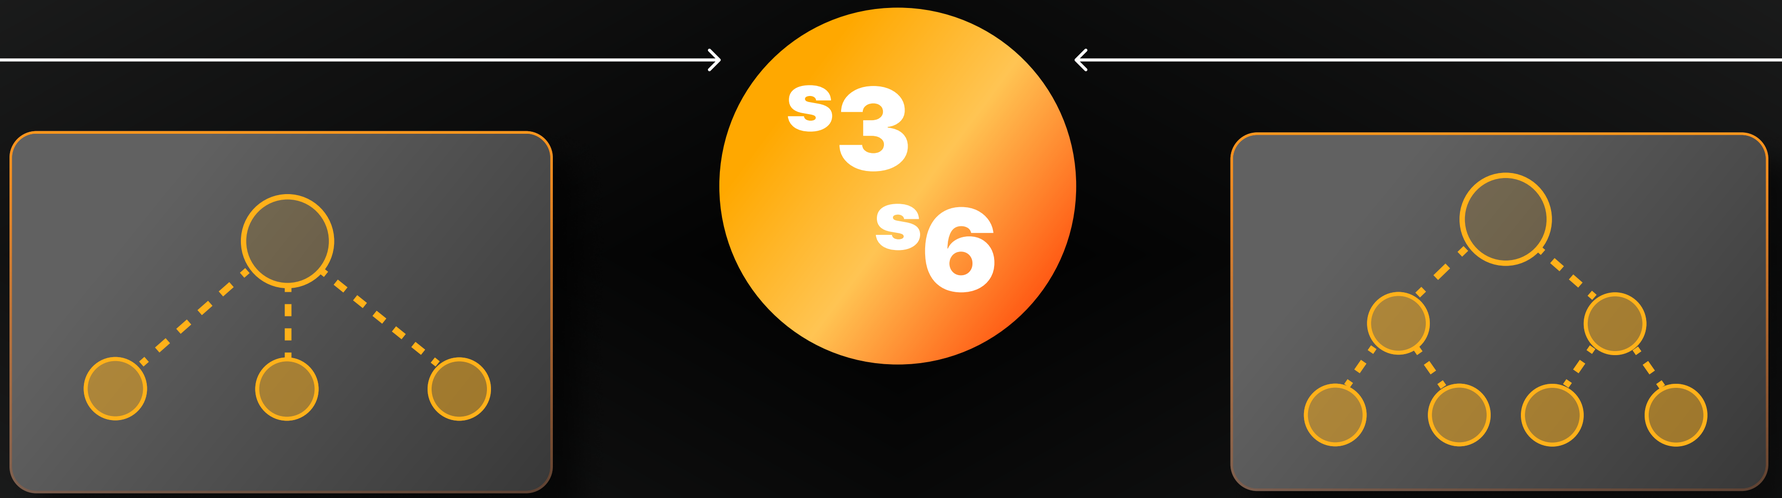
PRODUCT CONTRACT



FORCE

The nearest launch that awaits us is

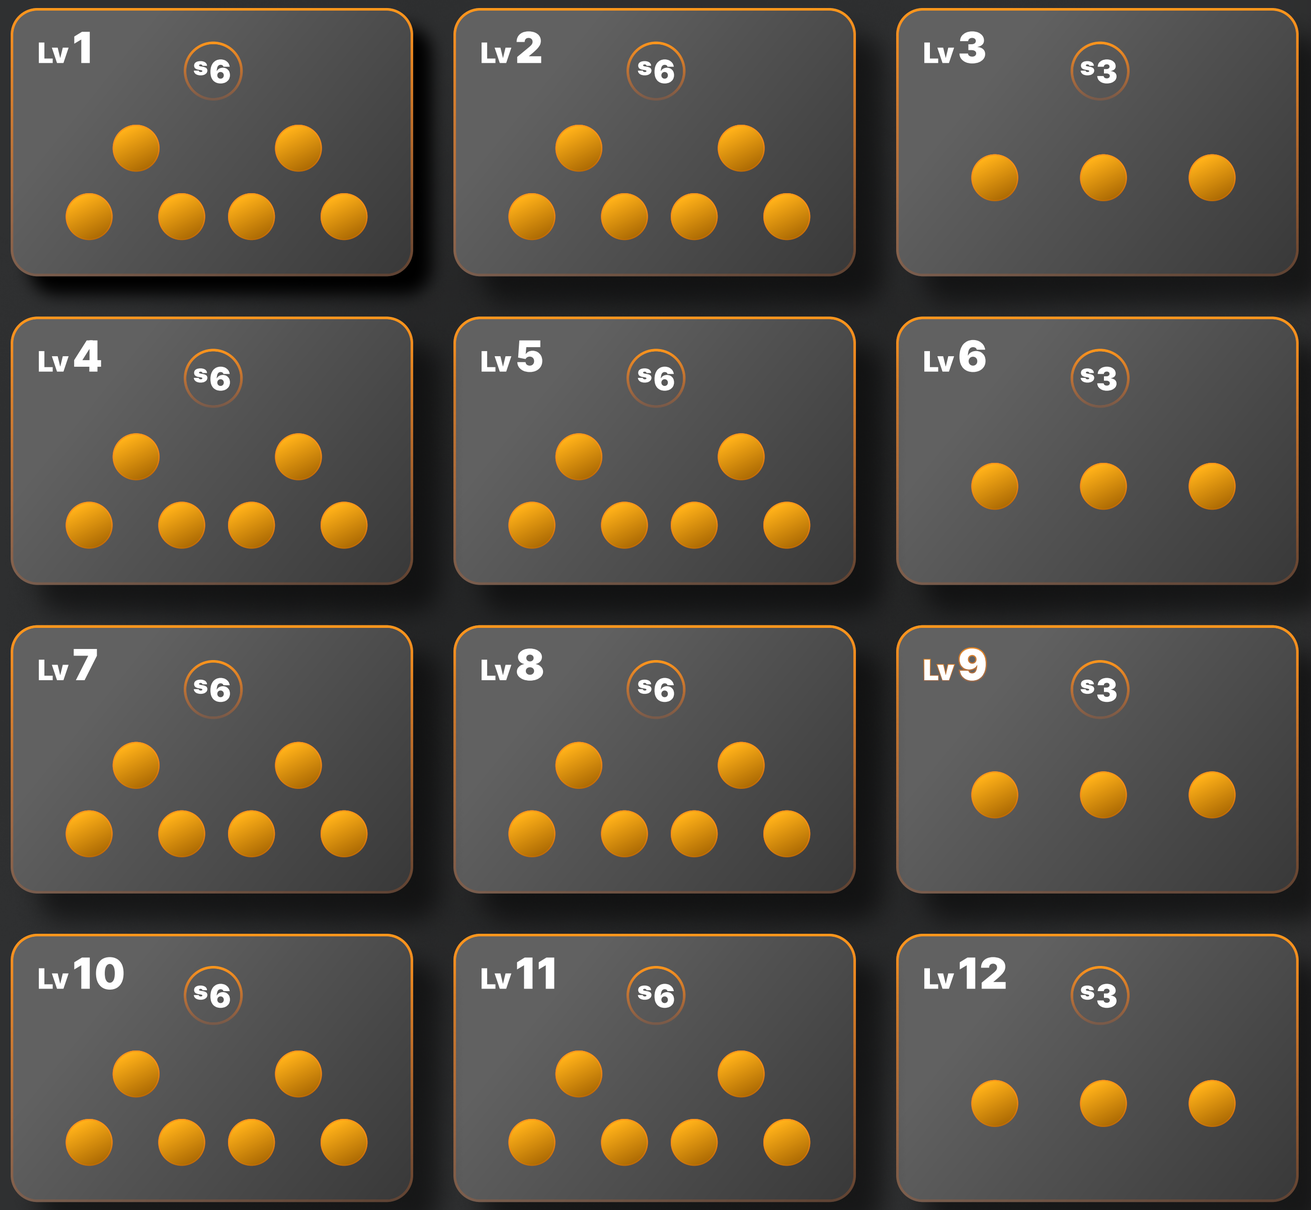
MARKETING CLASSIC



Classic program uses two types of matrices at the same time, s6 & s3. The digital value corresponds to the number of spots in the matrix, respectively - 6 & 3.

It is in the tandem of the two types that their force is manifested. Each of these matrices has its pros and cons. In a single program, the pros outweigh the cons.

MARKETING CLASSIC



The first level of the slot is an s6 scheme,
the second level is also s6,
and the third is s3 scheme

then it repeats two through one:

the fourth and fifth - s6, the sixth - s3,
the seventh and eighth - s6, the ninth - s3,
the tenth and eleventh - s6, twelfth - s3.

An important feature that requires a detailed explanation are re-activations, as well as upgrades.

All transactions take place on the stablecoin. At pre-launch, it is DAI (Polygon), and after issuance on IDO, our internal stablecoin, pegged to our coin, will be used. Thus, in dollars, all price and income figures remain fixed.

+

And do not forget that by activating the matrix, you get a product that you can use or sell.

DAI ⟶ FORCE coin

Where to start for a beginner?

To start a Meta Force business, you need stablecoins, (PoS) Tether DAI on the Polygon network.

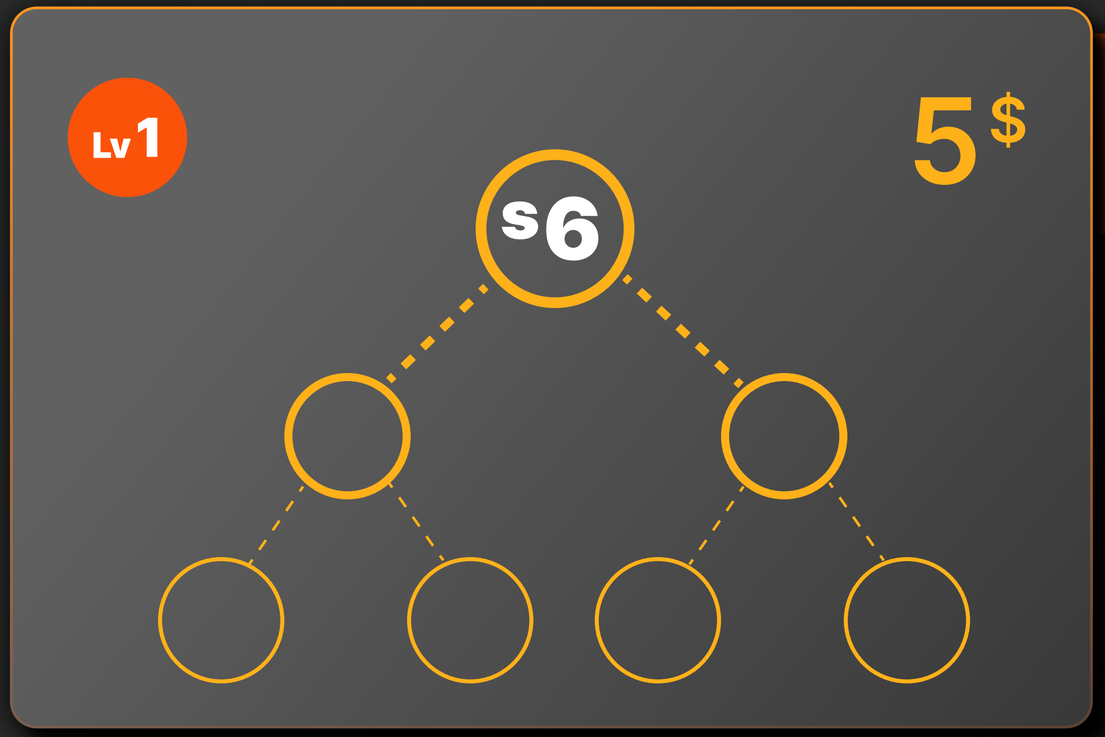
For all transactions you need to have a small amount of MATIC coins in order to pay fees.

Your first transaction will be null - this is a registration. By registering once, in the future you can activate any program without new registering. That is, by the time next programs are launched, you will be able to log in earlier.

Register using the referral link of the person who opened this business for you. And then you have more chances that people you invited to register strictly according to your referral link.
Referral connections are saved for all our programs.

UNIFIED PLATFORM SINGLE SIGN-ON

FORCE



→ 10 $

Activating the 1st level of the matrix costs 5 DAI (which is equal to 5 dollars). This is a pre-launch cost, about 3 weeks after the launch of the Force, a full start will take place, and the full cost of all levels will be 2 times higher. That is, the normal price of the 1st level of the matrix is 10 DAI.

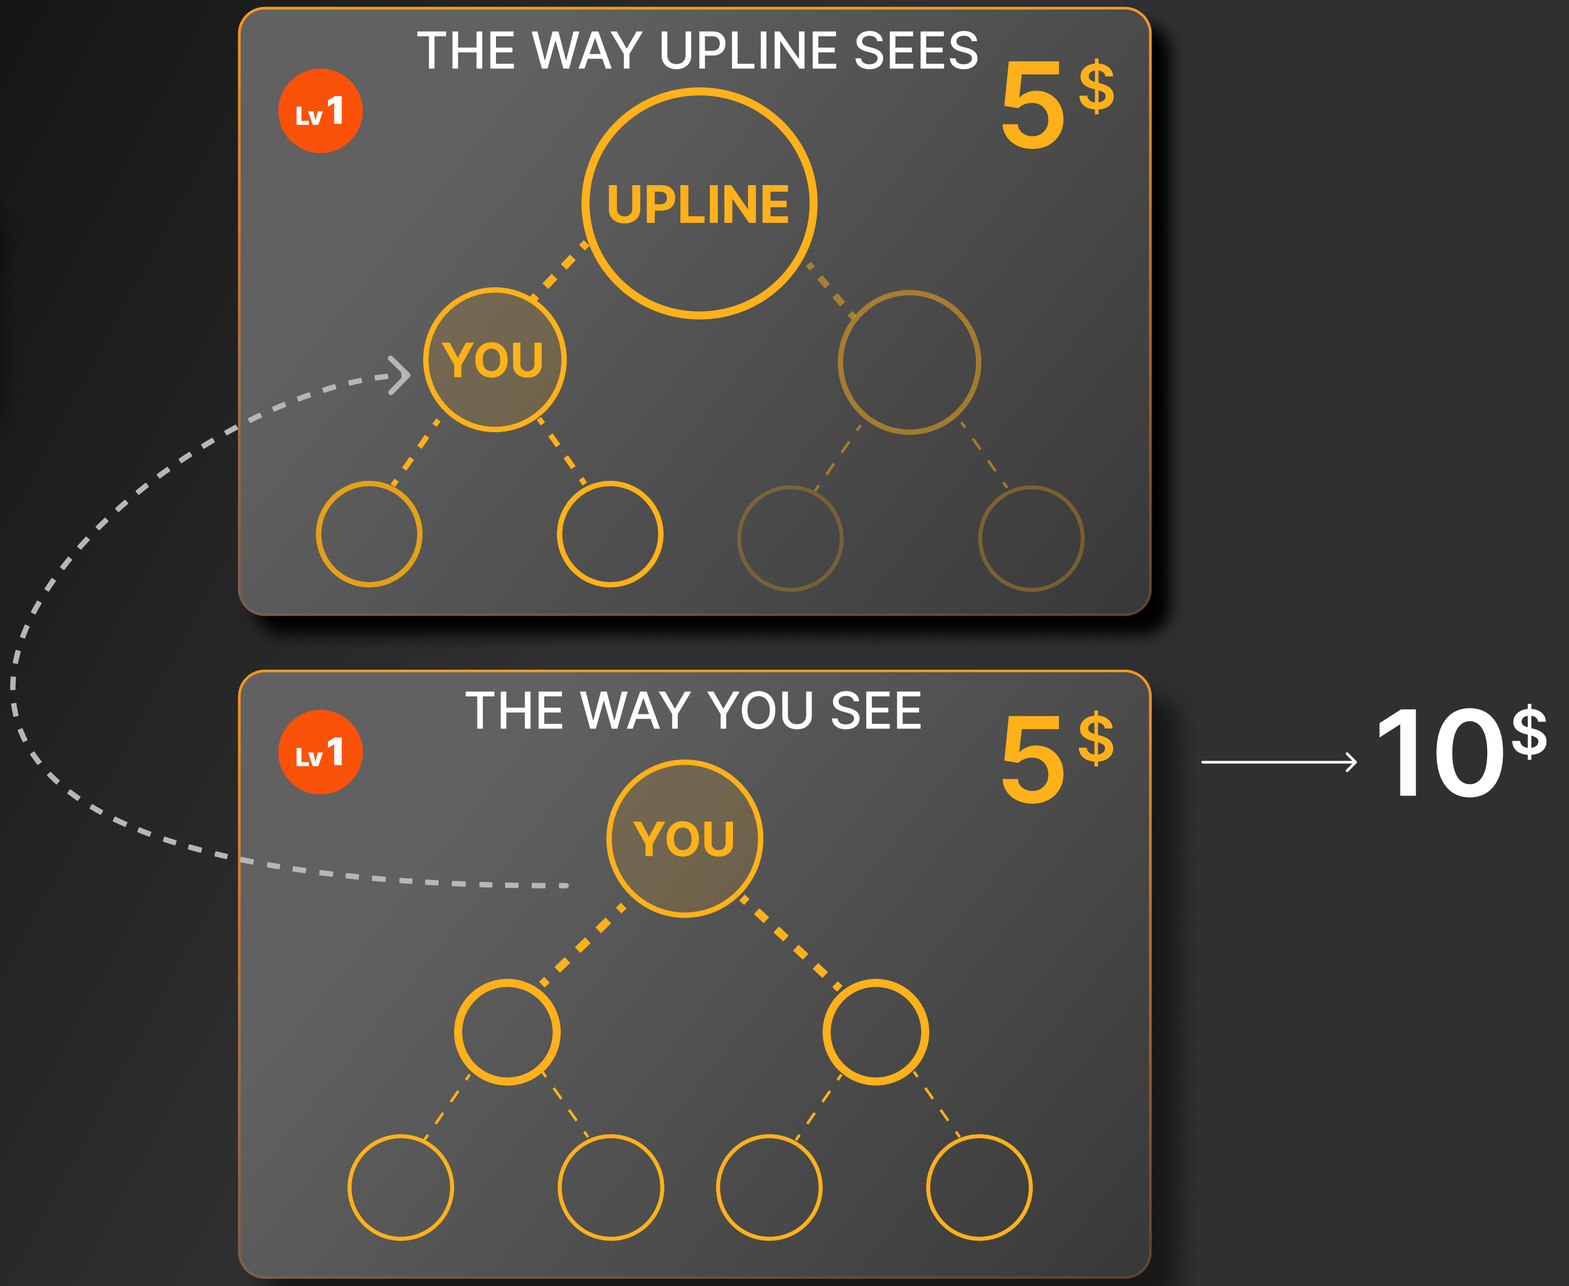
FORCE

MARKETING SYSTEM
EXPLANATION

As soon as the payment is made, it is instantly sent to the wallet of the higher partner, and you fill the matrix of your inviter.

At the same time, your own matrix opens up, in which there are 6 spots under you, two on the 1st line and four on the 2nd.

It is possible that a part of your matrix is inside the matrix of your upline, if you got to him in the 1st line.



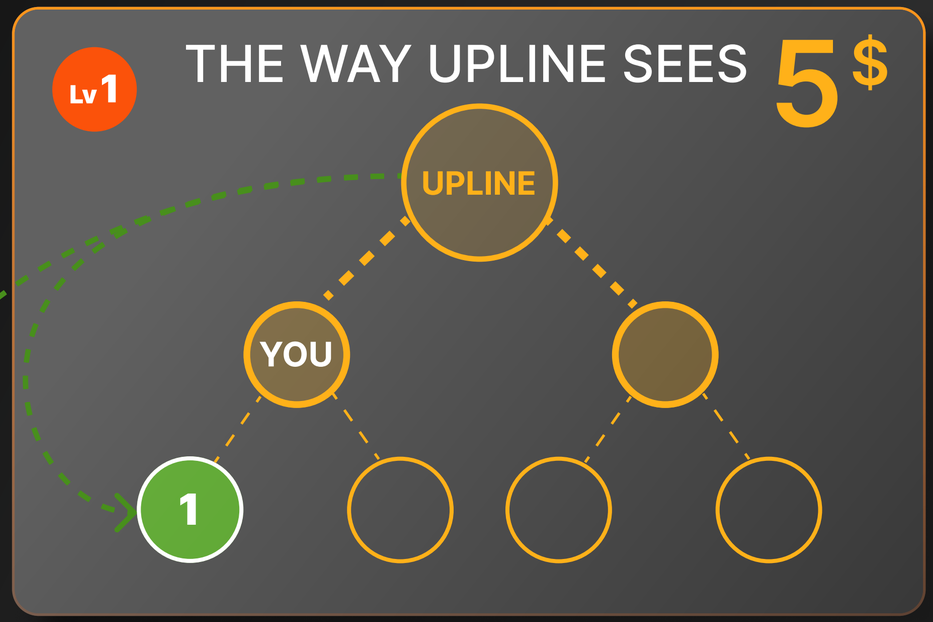
FORCE

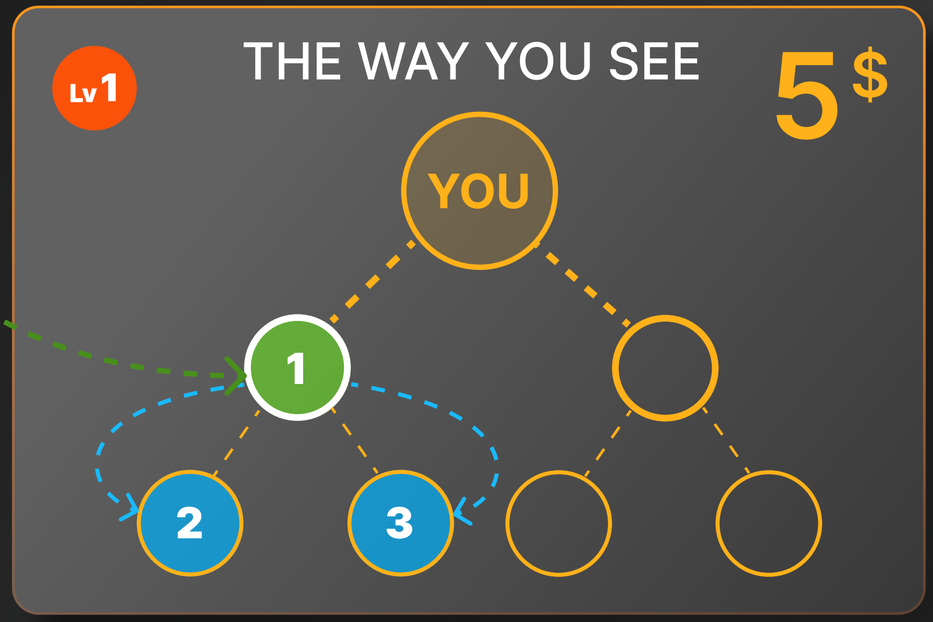
MARKETING SYSTEM
EXPLANATION

Filling in your matrix is possible both with your actions, if you invite, and spillovers from above, from a higher partner, as well as spillovers from below - when downlines who came over spillover are inviting.

Thus, with the whole team you fill in the spots, and the payments to you do not depend on whose invitee is the one who filled the spot of your matrix. Payouts in this slot come to you from the 2nd line. These are 4 payments of 100%.

When new participants activate their spots in your matrices, the funds sent directly to your wallet, or otherwise bring you income.





→ 10 $

RE-ACTIVATION

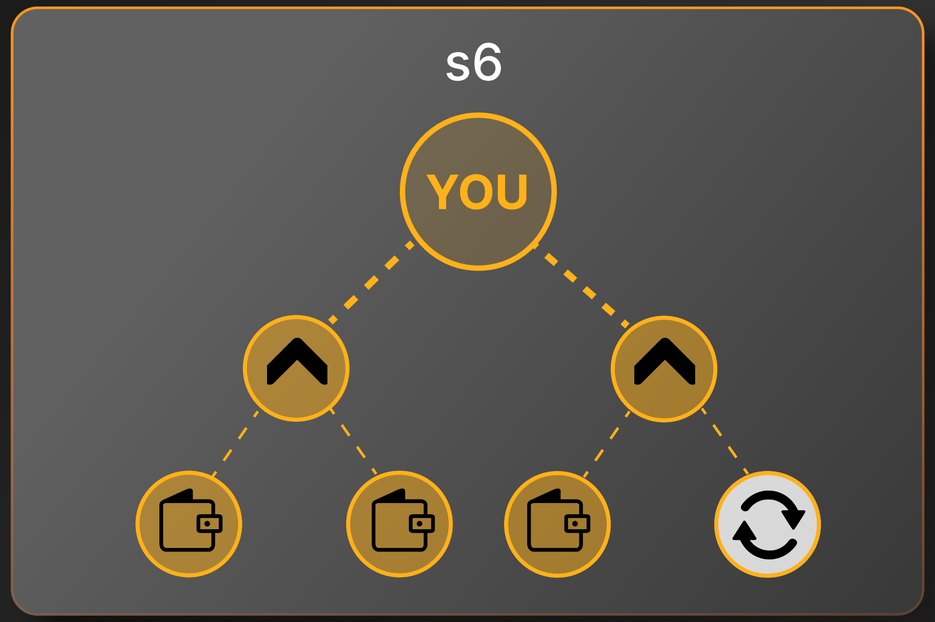
The last payment in matrix is intended for re-activation. It is activation of the same matrix when the previous one is completely filled. It is best to do this automatically, instantly after closing the previous one, so as not to miss income.

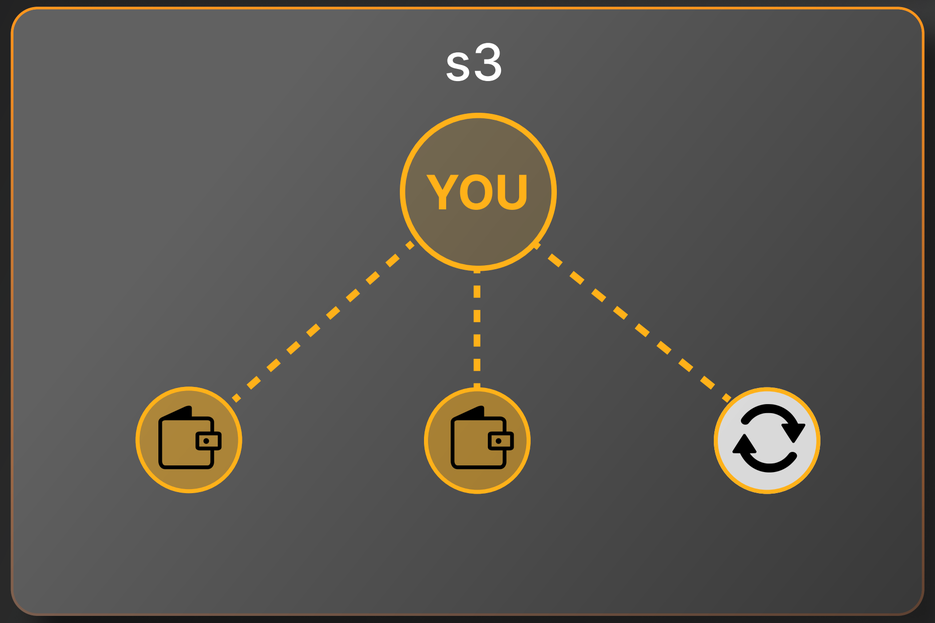
Therefore, the "auto-reactivation" mode is enabled by default.

If someone wants, they can disable this mode in their backoffice. We leave freedom of choice. However, in this case, you pay a fee of 25%, which goes to the Product Fund.

This approach is win-win for the System, everyone only benefits from it. If the participant disables auto-reinvestment, then the Product Fund is replenished. If it does not turn off, then the income-generating cycles continue.

Your partners also have a reactivation (if they do not turn it off). And they again take spot in your new matrix, and you receive income.





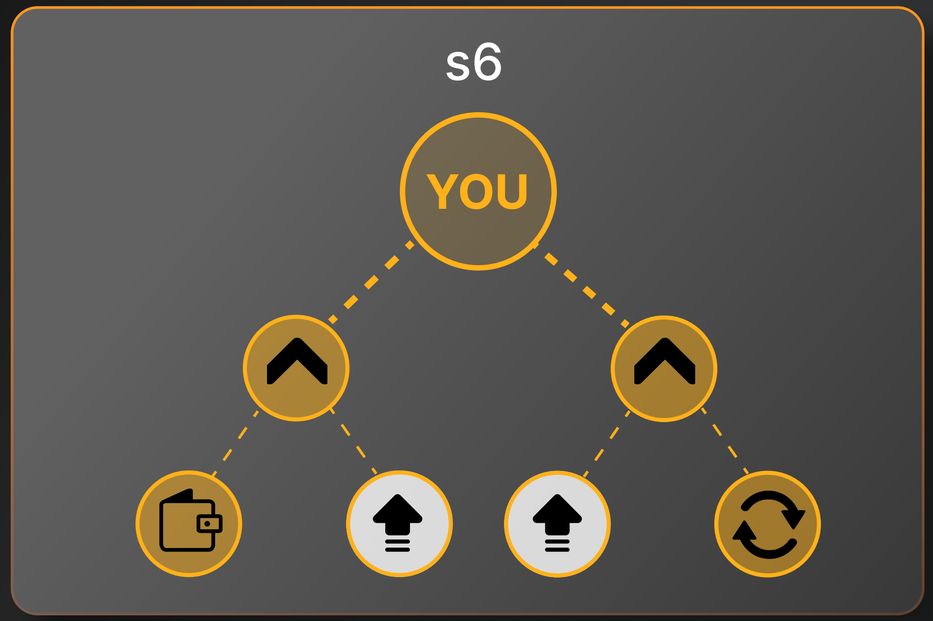
AUTO-UPGRADE ON

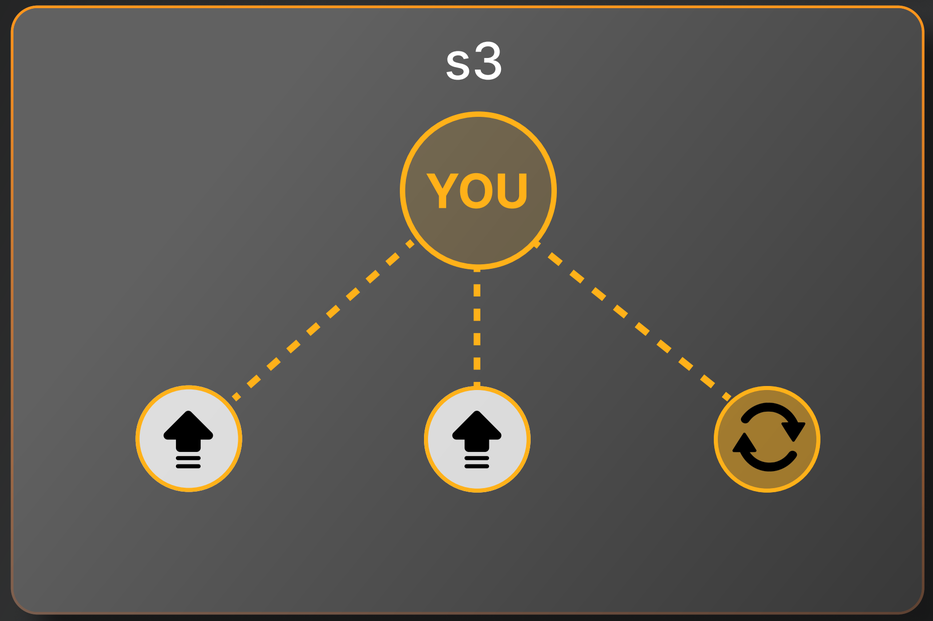
Thanks to Auto-Upgrades, you and your partners will not miss the profit and will increase the levels

Two payments are for auto-upgrade.
By default, auto-upgrade switched on at your top active level.
Except for the 12th, the topest one, of course.

Each next level costs exactly twice as much as the previous one, so you need to collect two payments, respectively. One payout is stored in a special smart contract for this, to which no one has access except you.

Then, as soon as another payout appears, the amount is combined, and the next level is instantly activated. Your downline partners will have the same, and thus your next level will fill up.





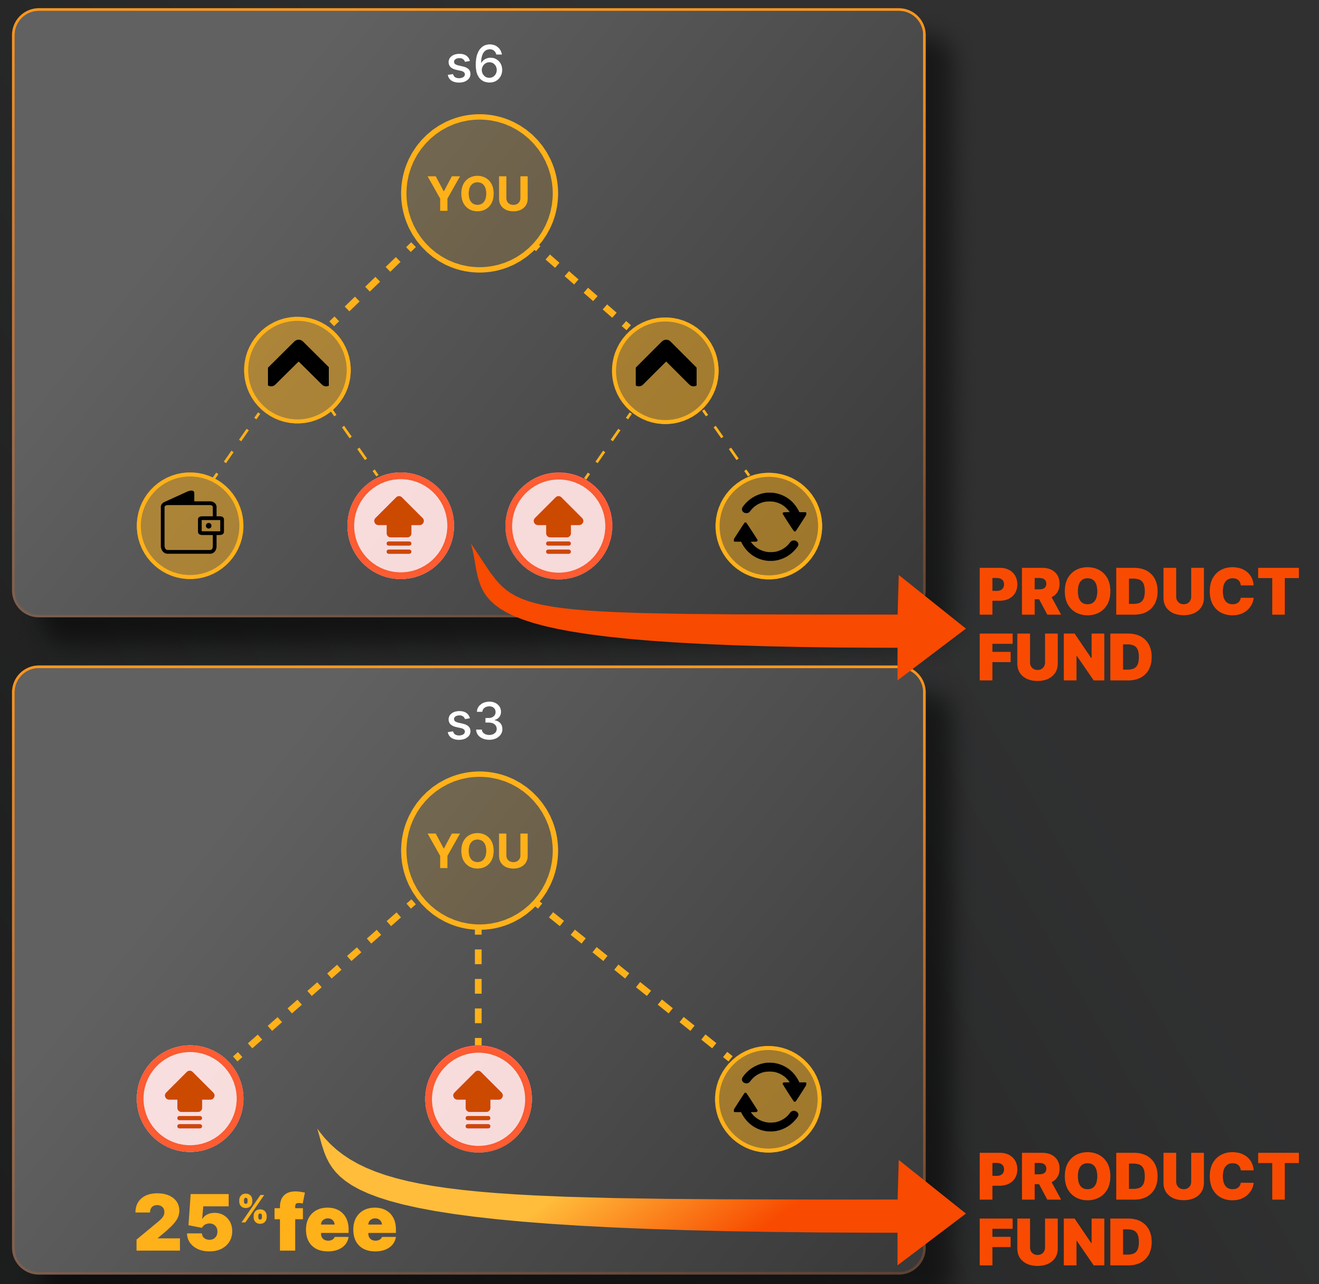
AUTO-UPGRADE OFF

Each participant has the opportunity to disable auto-upgrade by paying a

25% commission

Which immediately replenish the Fund of our product.

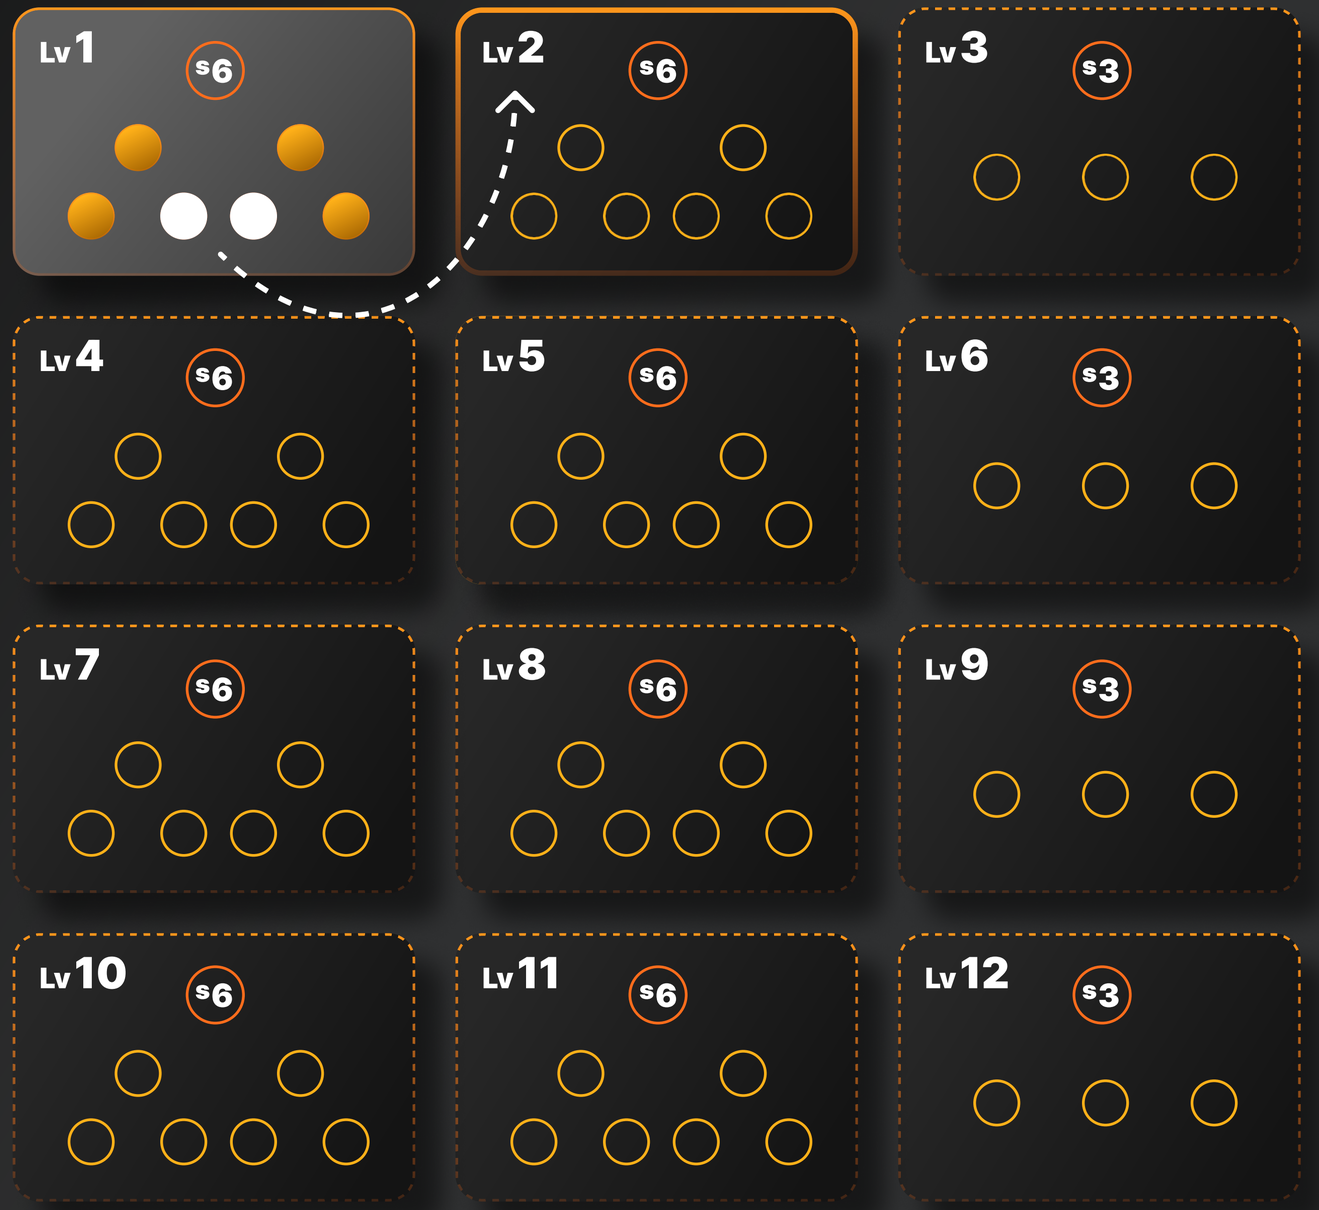
In this way, it turns out to be much fairer than in the old system, in which those who wanted to develop the structure often lost money by mistake. In the new version, the commission will be removed from those who do not want to develop, and these funds will benefit everyone.

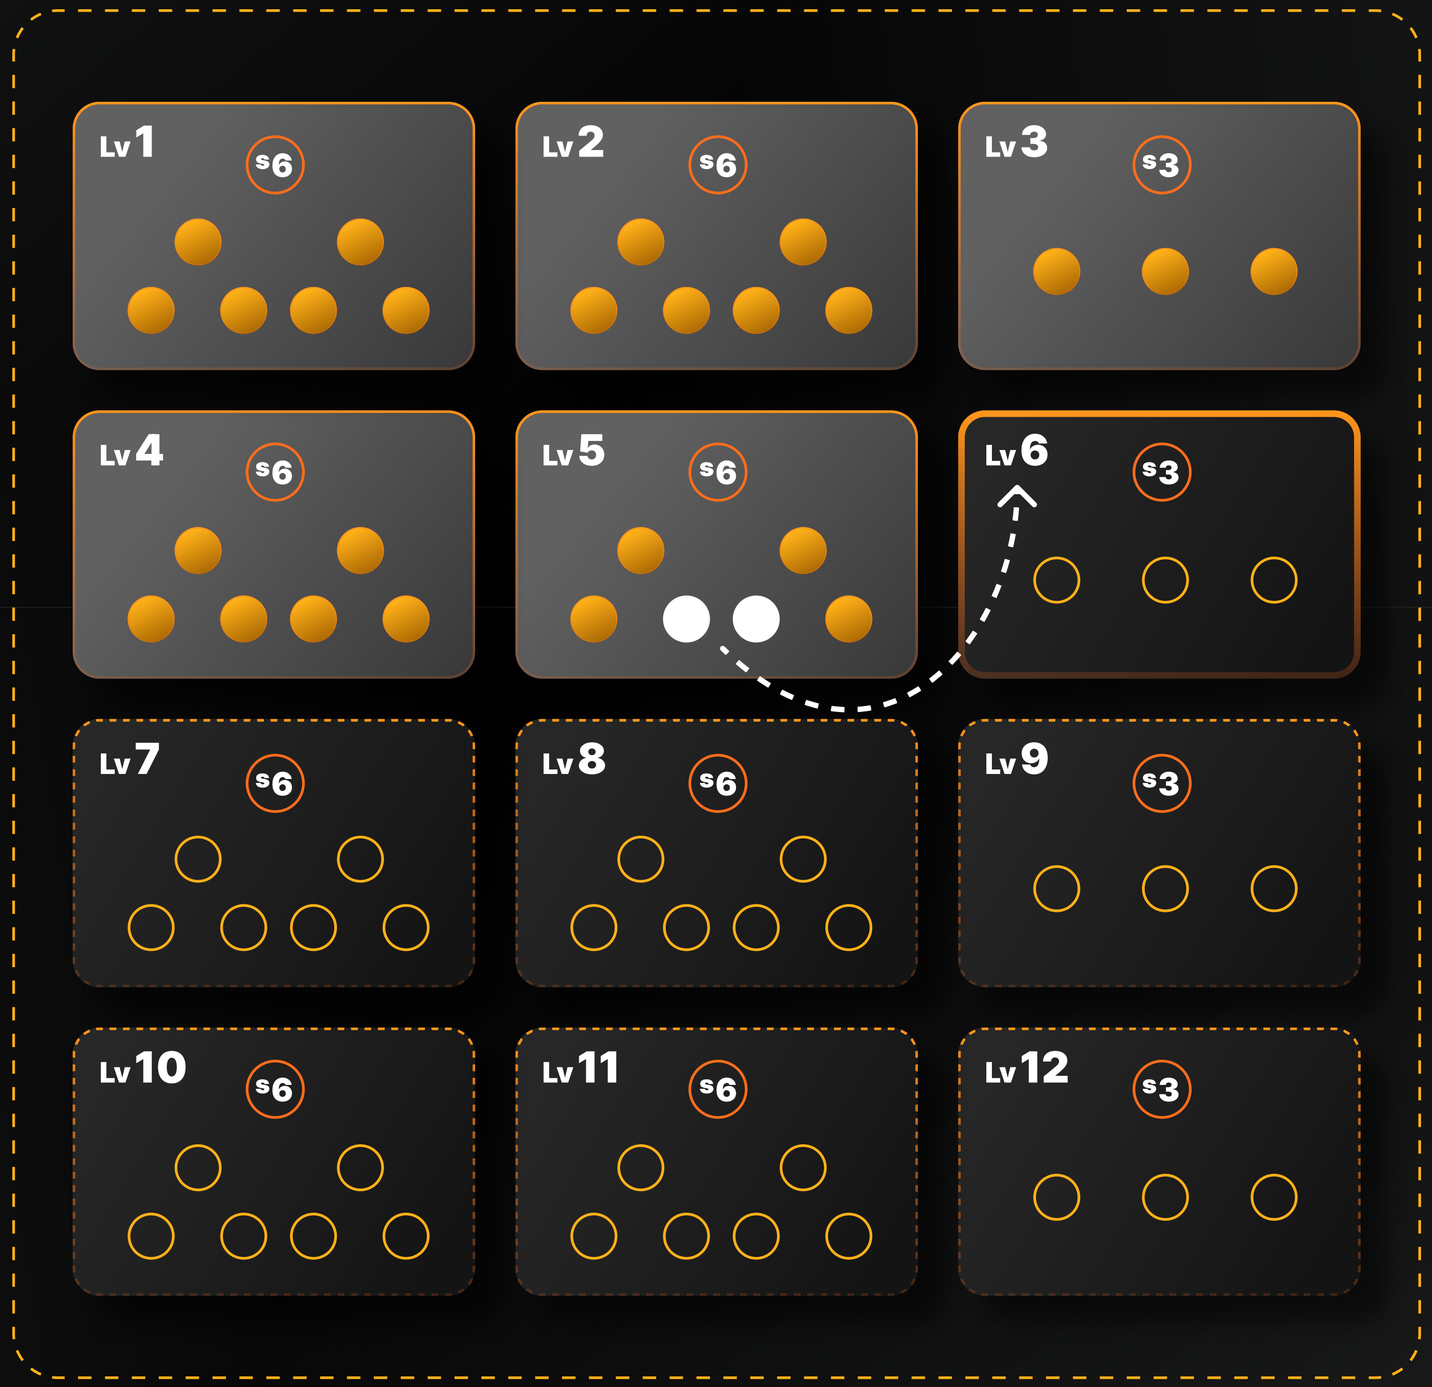


Accordingly, at the 1st level, you have auto-upgrade enabled by default, if the 2nd level is not already activated.

If you have already activated the 2nd level of the slot, then your 1st level do not need upgrade.

In the old scheme, the motivation for this was to freeze income after passing one circle of the matrix, if the next level is not activated. We decided to remove the freeze. This approach has a number of disadvantages.
Many simply do not notice that they have passed the circle, and they lose income.
Instead, we use auto-upgrades.



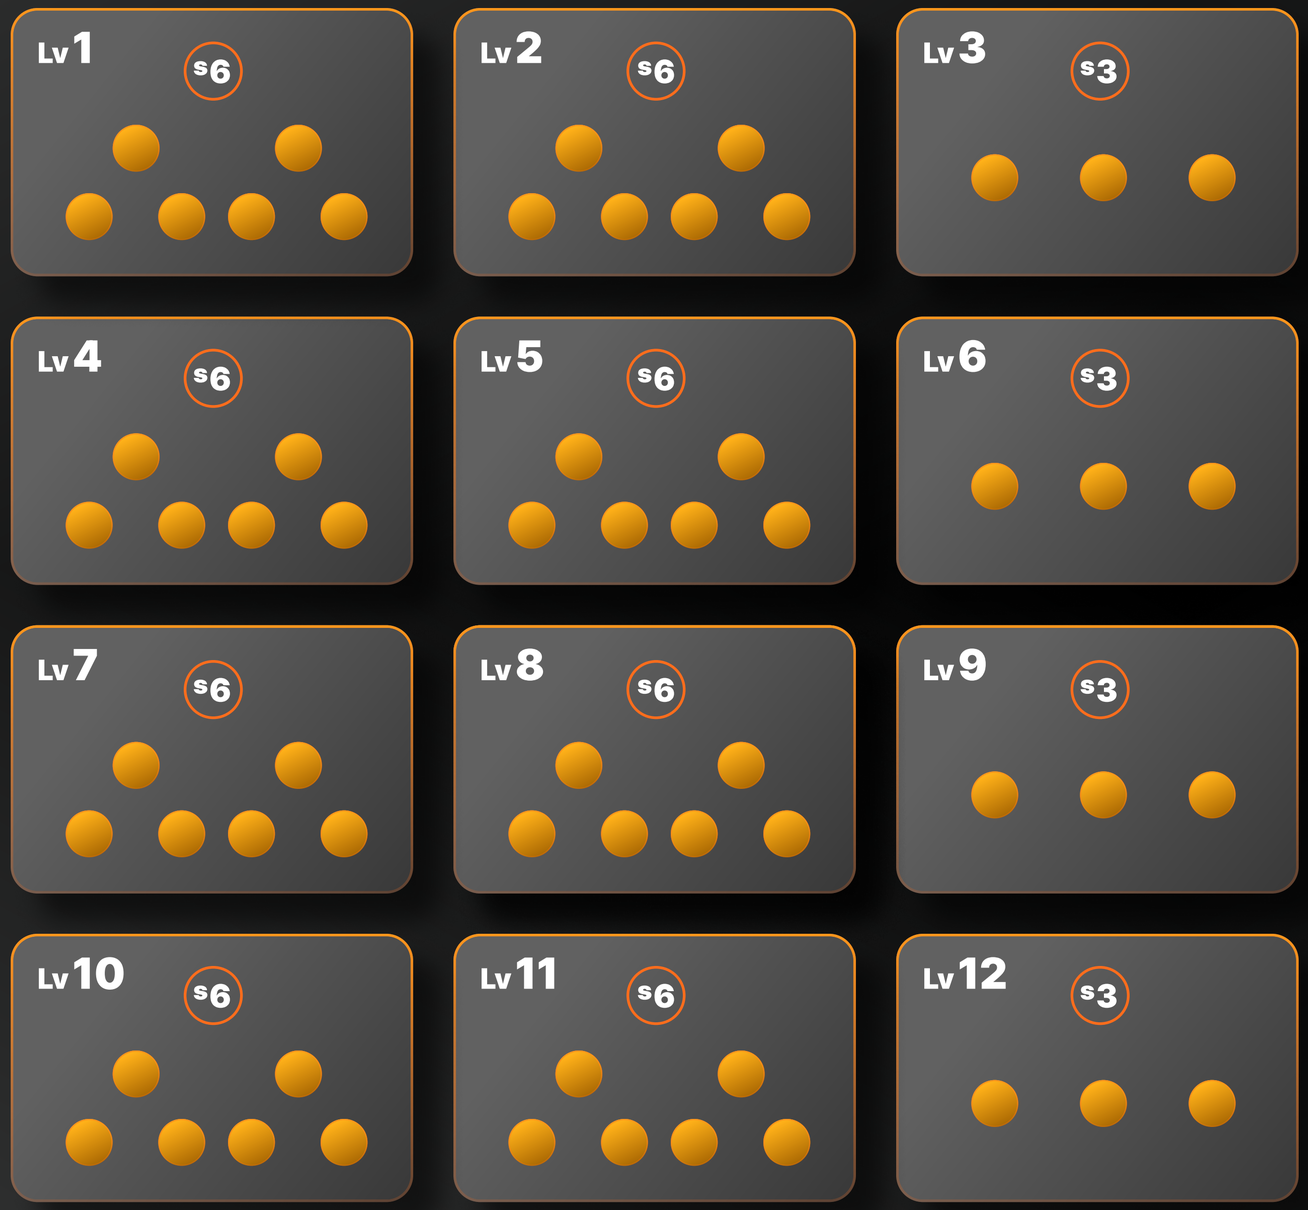


We recommend that most participants activate at least 5 levels of slots from the very start in order not to lose profit, because many will do this, and you need to have active matrices to make a profit.

In this case, auto-upgrade at the 5th level of the slot, after which the 6th slot is activated. The 6th level is s3, respectively, here, instead of 6, there are only 3 spots in one line.

Such a matrix gives the fastest income to active participants. You do not need to wait for the 1st line to be filled, you immediately receive 100% from everyone who fills your matrix.
Total 300% income,
of which 200% is net profit.

MARKETING CLASSIC



In total, the marketing Classic program has **12 levels** of matrix slots.

Every three levels, the sequence is repeated:
two matrices with 6 spots in two lines, 2+4,
and one matrix with three spots in one line.

All of them move at the same time, in parallel,
and all at the same time bring profit.

FORCE

Each next level can only be activated
sequentially, one after another:

after the first - the second,
then - the third,
then - the fourth, etc.

DAI → FORCE coin

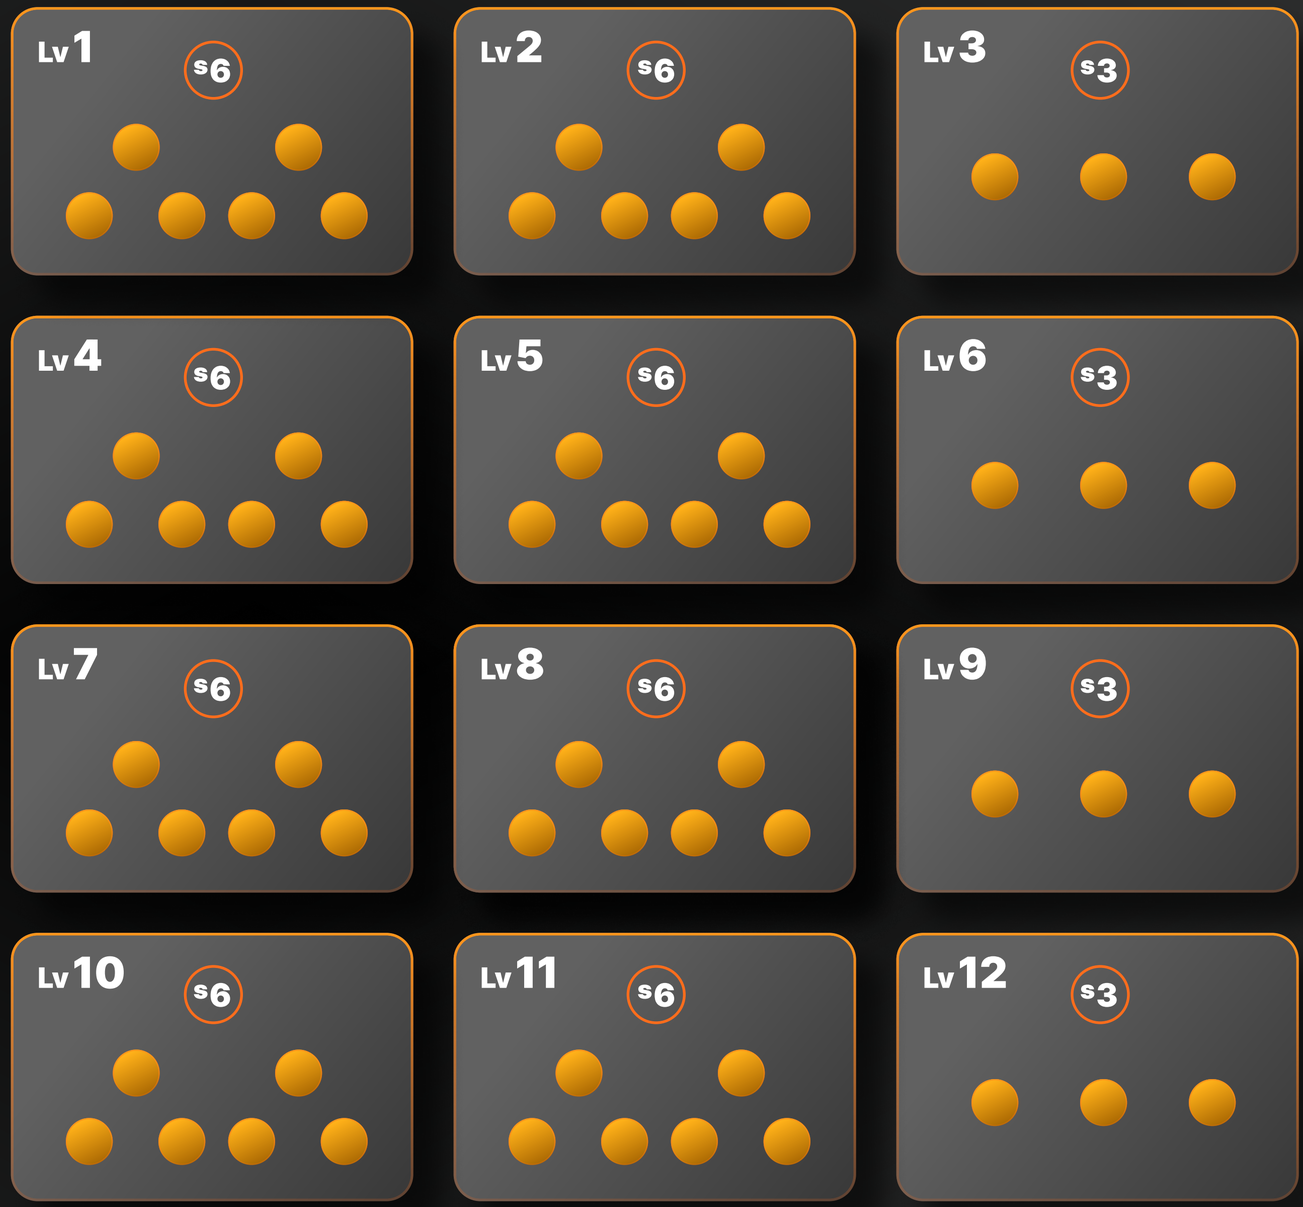
THE TOTAL IS 40 950 $

Net profit is what you receive directly to your wallet. Income is taking into account the last payment in the matrix leaving for reactivation.

At the end of each circle of matrix, you have a net profit, plus a new activated matrix that will bring you even more income.

If you add up the income from one circle of all slot levels, you get the amount of 70,200 dollars.
And the net profit is 49725. And this is only from one circle of each slot. After the start, it will be twice as much 99450 dollars net profit and 140400 income of each circle.



ALL SLOTS MOVE AT DIFFERENT SPEEDS

On average, each level of the slot is faster than the higher one by 1 circle. That is, something like this: while the 2nd level of the slot will make 1 circle, the 1st will already make two circles. When the 3rd level passes 1 circle, then the 2nd level will pass two circles, and the 1st - three circles. Etc.

With this calculation, the profitability of the full cycle of all matrices = $ 146,880. A net profit - $ 105,990 Pre-launch.
But this is all in prelaunch. After the start, similar movements give the amount of profit twice as much 211980 dollars net profit and 293760 income of each extended cycle!

Of course, these are only indicative figures and are not guaranteed.
But examples of these calculations adequately make it clear the real potential and possibilities of the Classic matrix for you.
